Does this meet the goal?

A. Yes
B. No

Answer: A
Explanation:
The Basic support plan does not have any technical support for engineers.
The Developer support plan has only technical support for engineers via email.
The Standard, Professional Direct, and Premier support plans have technical support for engineers via email and phone.

New Question
Your company has 10 departments.
The company plans to implement an Azure environment.
You need to ensure that each department can use a different payment option for the Azure services it consumes.
What should you create for each department?

A. a reservation
B. a subscription
C. a resource group
D. a container instance

Answer: B

New Question
Your company plans to migrate to Azure. The company has several departments. All the Azure resources used by each department will be managed by a department administrator.
You need to recommend an Azure deployment that provides the ability to segment Azure for the departments. The solution must minimize administrative effort.
What should you include in the recommendation?

A. multiple subscriptions
B. multiple Azure Active Directory (Azure AD) directories
C. multiple regions
D. multiple resource groups

Answer: A

New Question
A company has the requirement to have an automated process in place which would upload logs to an Azure SQL database every week. Reports would then be generated from the SQL database. Which of the following would you use for this requirement?

A. The AzCopy tool
B. Azure Data Factory
C. Azure HDInsight

D. Data Migration Assistant

Answer: B
Explanation:
You can use the Azure Data Factory to create a pipeline that can be used to copy data. Below is an excerpt from the Microsoft documentation on the connector for SQL server.
https://docs.microsoft.com/en-us/azure/data-factory/connector-sql-server

New Question
A company is planning on deploying an application onto Azure. The application will be based on the .Net core programming language. The application would be hosted using Azure Web apps. Below is part of the various requirements for the application:
- Gives the ability for the testing team to view the different components of an application and see the calls being made between the different application components
- Helps business analyse how many users actually return to the application
- Ensuring IT administrators get alerts based on critical conditions being met in the application
Which of the following service would be best suited for fulfilling the requirement of "Helps business analyse how many users actually return to the application"?

A. Application Insights
B. Azure Service Health
C. Azure Advisor
D. Azure Policies

Answer: A
Explanation:
https://docs.microsoft.com/en-us/azure/azure-monitor/app/usage-retention

New Question
A company has setup an Azure subscription and an Azure tenant. They have purchased Premium P2 licenses. There are different departments that have different requirements for managing identities.

Department	Requirement
Procurement	Get notifications whenever roles are activated Provide just in time access to Azure resources
Human Resources	Ability to conduct access reviews
Logistics	Ensure Applications hosted on the virtual machines can safely access the Azure Key vault service

Which of the following would you suggest for the Logistics department?

A. Managed Service Identity
B. Identity Protection
C. Privileged Identity Management
D. Azure AD Connect

Answer: A
Explanation:
This is clearly given in the Microsoft documentation wherein the Privileged Identity Management feature would fulfil this requirement.
https://docs.microsoft.com/en-us/azure/active-directory/managed-identities-azure-

resources/overview

New Question
A company has developed a web service that is made available on a virtual machine deployed to a subnet in the Virtual network.
An API Management service has been deployed, which will provide access to the API service hosted on the Virtual Machine.
Consultant companies must be able to connect to the API over the Internet.
Below is the configuration of the API management gateway instance
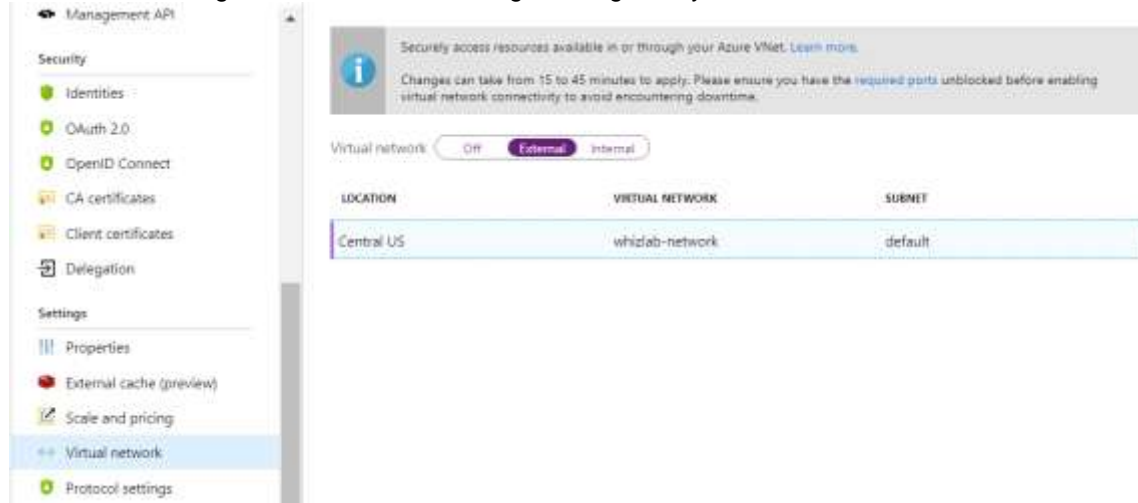

Based on the configuration, would the API be available to the consultants over the Internet?

A. Yes
B. No

Answer: A
Explanation:
https://docs.microsoft.com/en-us/azure/api-management/api-management-using-with-vnet

New Question
A company wants to deploy an application to Azure. The application has the below requirements:
- Give the ability to install and provide access to the full .Net framework
- Allow administrative access to the operating system
- Provide a level of redundancy if an Azure region fails
You decide to deploy 2 Azure Virtual Machines in 2 separate regions. And then you create a Traffic Manager Profile
Does this solution meet the requirement?

A. Yes
B. No

Answer: A
Explanation:
Yes, this will meet all the requirements. Since you are using Azure Virtual Machines, IT administrators can get the required access. You can also then get the required access to the

underlying software including the .Net framework.
Using a Traffic Manager profile along with the failover routing policy can ensure the requirement for redundancy is fulfilled.
https://docs.microsoft.com/en-us/azure/traffic-manager/traffic-manager-overview

New Question
A team has an Azure CosmosDB account. A solution needs to be in place to generate an alert from Azure Log Analytics when a query request charge exceeds 40 units more than 10 times during a 10-minute window.
Which of the following would you recommend? (Choose two)

A. Create a search query to identify when the requestCharge_s exceeds 40.
B. Create a search query to identify when the requestCharge_s exceeds 10.
C. Create a search query to identify when the duration_s exceeds 10.
D. Configure a period of 10 and a frequency of 10.

Answer: AD
Explanation:
https://docs.microsoft.com/en-us/azure/cosmos-db/logging

New Question
Our team needs to deploy a Virtual machine that will host a SQL Server. The Virtual machine will have 2 data disks, one for the log file and the other for the data files. You need to recommend a caching policy for each disk
Which of the following would you recommend for the data disk containing the logs?

A. None
B. ReadOnly
C. WriteOnly
D. ReadWrite

Answer: A
Explanation:
https://docs.microsoft.com/en-us/azure/virtual-machines/windows/sql/virtual-machines-windows-sql-performance
